

README

This is a simple Todo application built using Flutter with Firebase as the backend and Bloc for state management.

Features:

- Add, edit, and delete tasks.
- Mark tasks as completed.
- Firebase backend for real-time synchronization.
- State management handled efficiently with Bloc.

Technologies Used:

- Flutter
- Firebase
- Bloc State Management

How to Use:

- 1 Clone the repository.
- 2 Set up Firebase backend and configure your project.
- 3 Run the app on your preferred emulator or physical device.
- 4 Start managing your tasks efficiently!
